Attached is a second copy of the Fall 2002 summary of stewardship reporting requirements for WSDOT construction contracts. A review of the initial listing sent out in mid October identified a few minor changes. These have been made and this list should stand until May of 2003. This summary can also be found on the intranet at the Construction office website, <http://www.wsdot.wa.gov/biz/construction/Reports.cfm>.

If I can assist you with questions about stewardship reporting, procedures, and requirements please let me know. I can be reached at 7833. Ron is also available to visit the region for training or to attend discussions of the subject.
